

THERMOFORMING MACHINE

FS SERIES 10 PREMIUM

MULTI PROCESS CONFIGURATION | ERGONOMIC CHANGE OVER | CONFIGURABLE DESIGN | ERGONOMIC MAINTENANCE

FS SERIE 10 PREMIUM :

Excellence in Service of Productivity

The Mecapack FS Series 10 Premium is a fully customizable thermoforming system engineered to adapt to specific operational environments, production constraints, and manufacturing objectives.

With modular and scalable architecture, it incorporates tailored solutions to optimize performance, operational flexibility, and ergonomics while ensuring seamless integration into existing production environments.

WIDTH	Customizable configuration up to 660 mm / 26 inches maximum
ADVANCE STEP	Customizable configuration up to 1000 mm / 39,4 inches
FRAME LENGTH	Custom-engineered according to project requirements
CONTROL SYSTEM	12' Panel PC with adjustable mounting bracket
OPTION	Ergonomic loading bridge system 19' control screen with adjustable mounting bracket Integrated chiller unit Advanced film tracking system Product marking capabilities Motorized discharge conveyor system Integrated labeling solutions
PROCESS	Compatible with all packaging applications
FILM	Flexible, semi-rigid, and rigid film materials

ERGONOMICS & MAINTENANCE

Maintenance Accessibility
Fully removable safety guarding system enables:
- Rapid and precise diagnostic procedures
- Significantly reduced maintenance intervention time
- Complete component accessibility for service operations

HUMAN-MACHINE INTERFACE (HMI)

Advanced operator interface provides immediate access to:
Comprehensive control dashboard, Parameter settings and configurations, Technical manuals and documentation, Electrical schematics and diagrams, Instructional and maintenance video libraries, OEE monitoring and data extraction for performance analysis

OPERATOR EFFICIENCY FEATURES

Rapid access to tooling components via proprietary Ergo Tooling Pack | Tool-free format changeover capabilities | Adjustable film reel support systems | Customizable loading bridge configurations | Additional ergonomic enhancements

SANITARY DESIGN & CLEANING

Strategically engineered surface slopes for optimal drainage efficiency | Removable protective skirts for cleaning access | Complete accessibility for sanitation procedures | Elimination of product retention zones

NEW FS SERIES 10 RANGE COMPACT | OPTIMUM | PREMIUM

Experience our new generation of thermoforming equipment, developed through close collaboration with industry partners. Leveraging extensive production expertise and advanced technical capabilities, we have engineered innovative solutions that surpass the expectations of food processing professionals. This new range represents successful synergy, combining superior performance, cutting-edge innovation, and advanced ergonomics.
